

0.6.1

New

- Send a Google Calendar invitation and an iCalendar file when a task is assigned to a user.
- Display a warning when you click the URL of a nonexistent meeting.
- Display a warning and links to download when you are using an unsupported browser.

Changed

- Integration of the agenda to the publication of the minutes to facilitate his production.
- Addition of a URL linking to Beenote in the Google Agenda invitations, the iCalender invitation files and the task assignment email.
- Possibility to only select the items you want to see in the minutes of a meeting.

Fixed Issues

- Fix autosave issue that prevented the closure of the meeting.
- Fix an issue that erased the last characters written when taking notes.
