

0.7.0

New

- Start a meeting in two clicks using the new *Meet Now* option.
- Overhaul of the minutes section, which optimizes production, readability and printing documents :
 - Added several new options for creating custom reports. You can display the information you want.
 - Ability to save multiple display templates and reuse them in one click.
 - Ability to integrate your corporate logo to create documents matching your corporate image.
 - Files joined to the agenda are now accessible in the meeting's minutes.

Changed

- Display the preview in the browser's current tab along with a back button for easier navigation.
- Repositioning of the meeting creation button for an increased visibility.
- Possibility to send an email to people you invite during a meeting.
- Send an email notification to people assigned to a task created off meeting.
- Addition of an option to sort the tasks according to their type in your Beespace.

Fixed Issues

- Display attachments in a new tab on your browser.
- Loss of the *Task owner* and the *Delegate* by inserting a task in a meeting from the register.
- Fix some minor issues to make the Beenote experience more user-friendly and pleasant.

Documentation

- Addition of a link in the application that points to the release notes on Beenote's website.
