

0.7.3

New

- A visual indication alerts the administrator that one or more user requests to join the organization are pending approval.
- A meeting left inactive for a period exceeding twice the time planned will be automatically closed.
- Ability to change a meeting from a folder.
- Display a visual indicator in the beespace when a task is added or modified.
- Creation of a single access point to beenote. You can now logon, create and join an organization at the same place.
- Ability to sort tasks by type to facilitate their management.

Changed

- The task and the task owner now appear on the same line in «minimal» mode when the screen width allows it.
- Ability to define a personal display model of the minutes as the default template.
- Remove the status of the decisions.
- Guest members of the organization, when invited, automatically become participants.
- When a note from a list item in a subject on the agenda is created, and if it is too long for the title, it is rather transcribed in the Details field.

Fixed Issues

- Fix an issue that made it possible to set a second task owner for the tasks.
- The date and the duration of the meeting were distorted when moving the first topic.
- Increase the size of the title tasks field.
- Fix the error message that always appears in English when you create two folders with the same name.
- Prevent the creation of a model without options name of the minutes.
- Fix some minor issues to make the Beenote experience more user-friendly and pleasant.
