

# 0.8.1

## New

- A new drop-down menu displaying the organizations to which the user belongs for an easier connexion to Beenote.
- Confirmation before suppression of the audio recordings.
- A “blocker”-like label that allows associate the notes (notes, tasks and decisions).

## Modifications

- Minutes printing button has been moved to the top of the page.
- Redesigned the Tasks and decisions registry during the meeting and minutes preparation interfaces.
- Redesigned the Decisions registry interface in the Folders menu.
- When duplicating a meeting, all the previous meeting tasks are monitored, regardless of their status.
- It's now possible to delete an ongoing meeting.

## Fixed Issues

- Automatic recording button has been removed when the browser in use doesn't allow it.
- Notes, Tasks and Decisions buttons weren't visible on mobile devices.
- Audio recording is possible from Google Chrome version 48 and less and also from Microsoft Edge.
- Improved display, text and icons alignment for a more enjoyable viewing experience.
- Some minor issues fixed.
