

0.9.0

What's new

- Complete redesign of the Beenote's interface.
- New colors, new icons and buttons movements for better ergonomics.
- Every effort has been made to make the Beenote experience even more user-friendly, efficient and intuitive.

Modifications

- Labels have been temporarily removed for future use.
- Translation of some messages and warnings that were only in English.
- The online help has been updated to reflect changes in the interface.
- In reports preparation, the logic of inserting new notes has been improved.
- Improved compatibility with IE10

Corrections

- Automatic recording icon appeared on Safari IOS while this feature is not available.
- Forced refresh of the application when changing version to avoid display problems caused by cached files and images.
- The order of points of a list in a subject could be corrupted by moving them.
- During the meeting, the navigation bar could be displayed by clicking on "previous page" from a meeting report.
- The role of the participants was lost in the meeting's minute preparation.
- New profile picture was not displayed after changing it.
